About this item

7 stainless steel HPCR bearings plus 1 roller bearing X-cräftic alloy frame and side plate Power stack carbon matrix drag System D2 gear design Dragger brass gear INTRODUCTION: The REVO LTX BF8 is a baitcasting reel designed for precision casting and smooth retrieves. Some of its key features may include: Gear Ratio: "BF8" in the model name might indicate a specific gear ratio (e.g., 8:1), which refers to how many times the spool rotates with each complete turn of the reel handle. Higher gear ratios result in faster retrieval rates. Low Profile Design: The REVO LTX BF8 is likely a low-profile baitcasting reel, which makes it more ergonomic and comfortable to handle during extended fishing sessions. Advanced Materials: The reel might incorporate advanced materials in its construction, such as lightweight yet durable components, to enhance performance and reduce fatigue. Brake System: It could come equipped with an advanced brake system (e.g., magnetic or centrifugal) that helps prevent backlash and allows for precise casting control. Bearings: High-quality bearings can contribute to smooth and reliable operation during casting and retrieving.

Drag System: A high-quality drag system is crucial for handling big fish and preventing line breakage. Line Capacity: The reel should have adequate line capacity for different fishing situations.
