

3000w Underwater Fishing Light 4000w Green LED Fishing Light Underwater Boat In Ocean

Our Product Introduction

for more products please visit us on fishing-set.com

Basic Information

- Place of Origin: Shandong China
- Brand Name: Sunrise
- Certification: ISO
- Model Number: 379
- Minimum Order Quantity: 500 Pieces
- Price: 350 USD/Piece
- Packaging Details: Negotiated / Standard Package
- Delivery Time: Negotiated / 20 Working Days After Payment
- Payment Terms: T/T
- Supply Ability: 10000 Pieces/Month

Product Specification

- Product Name: Led Underwater Fish Light
- Material: Stainless Steel 316
- Item Type: Fishing Light
- Lighting Solutions Service: Lighting And Circuitry Design, Agi32 Layout, Auto CAD Layout
- Color Rendering Index(Ra): 70
- Working Time (hours): 50000
- Working Temperature(): -10 - 70
- Net Weight: 9.8kg
- Highlight: 3000w Underwater Fishing Light, Underwater Fishing Light 4000w, 4000w Green LED Fishing Light Ocean

Product Description

3000w 4000w Green LED Fishing Light Underwater Boat Catching Fish In Ocean

Underwater fishing lights, also known as submersible fishing lights or fish attracting lights, are specialized lighting devices designed to attract fish and enhance fishing success, particularly during nighttime or low-light conditions. These lights are commonly used by anglers for various types of fishing, including freshwater and saltwater fishing. Here's some information about underwater fishing lights:

Purpose: The primary purpose of underwater fishing lights is to attract baitfish and other smaller aquatic organisms, which, in turn, attract larger predatory fish. The light attracts plankton, insects, and small fish, creating a concentrated source of food for larger game fish.

Types of Underwater Fishing Lights:

Submersible Lights: These lights are designed to be submerged underwater, often attached to the side or bottom of a boat, a dock, or a buoy. They can be used in both freshwater and saltwater environments.

Floating Lights: Some underwater fishing lights are designed to float on the water's surface, providing illumination that attracts fish both above and below the waterline.

LED Lights: Many modern underwater fishing lights use energy-efficient LED technology, which provides bright and long-lasting illumination. LED lights come in various colors, with green and blue being popular choices because they are less likely to attract insects.

Colors: Different colors of lights can be used to target specific types of fish. For example, green lights are often used for attracting baitfish like minnows, while blue lights may be used to attract game fish like speckled trout and redfish.

Power Source: Underwater fishing lights are typically powered by batteries or can be connected to a boat's electrical system. Battery-powered lights offer more flexibility and can be used in remote locations.

Installation: Installing underwater fishing lights is relatively simple. They can be hung over the side of a boat, placed on the lake or river bottom, or attached to docks or piers.

The goal is to position the light where it can create a visible glow in the water.

Regulations: It's essential to be aware of local fishing regulations when using underwater fishing lights. Some areas may have restrictions on their use to protect fish populations or natural habitats.

Effectiveness: The effectiveness of underwater fishing lights can vary depending on factors such as location, water clarity, and the specific species of fish you are targeting. They are generally more effective in attracting fish in dark or low-light conditions.

Maintenance: Regular maintenance is essential to ensure the longevity and performance of underwater fishing lights. Cleaning the light and checking its components for damage is important to keep it working optimally.

Underwater fishing lights can be a valuable tool for anglers looking to increase their catch rates, especially in environments where fish are known to be attracted to light sources. However, their effectiveness can vary, so it's essential to experiment with different setups and colors to see what works best in your specific fishing location and conditions. Additionally, always adhere to local fishing regulations when using underwater fishing lights.

Setting Information

power	3000w-3200w
rated voltage	200-240V AC
material	Nylon + Stainess Steel
light color	Warm White/Pure White/Green
led chip	Epistar/Sanan/Osram/Bridglux
temperature	2800K-7000K/Green/Blue
Hole diameter	75MM
Shelf life	3 years

Product Description

Product Details

Water Proof Rate: IP68

Out Dia:22CM / Inside Dia:7CM

Cover Material: Nylon
Handle Material: Stainless
Steel / Dia:4mm
Screw(Nuts) Hardness Level: 6
Cable Wire Spcs: 3*4 Square
Meters

Product Details

Lens: High Strength PVC
Cage: Treatment surface
Stainless Steel / 6pcs Post
Connection wires: High
Temperaturer Resistant Wire
Cable Wire CCC Authentication

Product Details

3000w-3200w power design
SMD led Green/warm/pure
white/Oem optional
Underwater: 50-150meters
(min~max)
Lighting Effeciency reach 100-
110lumen per watt
Total Weight: 10.5kg/N.W /
Gross 15.5kg included cable

Product Details

Packing Sizes:
1000W 27x27x34CM/1PC
3000W 57x24x26CM/1P
FACILITIES Included
1pc Switch
30meters cable wire

Model	HSTLU3000	HSTLU600	HSTLU1000
LED Light Source	SMD 2835	SMD 2835	SMD 2835
Consumption	3000W	600W	1000W
Input Voltage	AC200-240V	AC220-230V	AC220-230V

Installation Process

regulations when using underwater fishing lights.
