Product Description

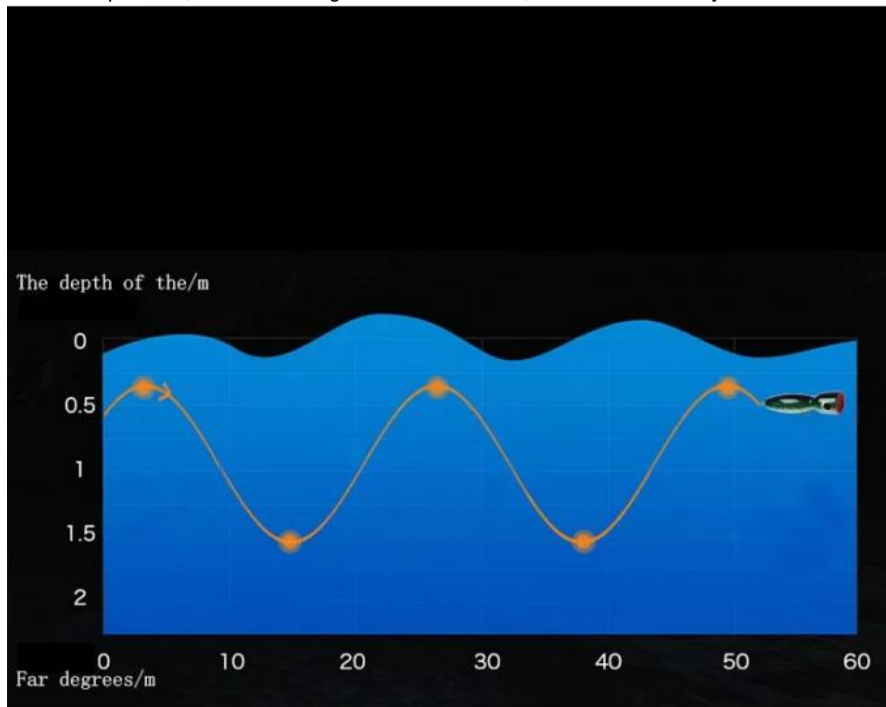

Wood Baits Wood Lures 175mm 120g Fishing Tackle Topwater Boat Fishing Lures

Features of Trolling Popper Baits:

Surface Action: Trolling popper baits are topwater lures that create surface commotion and splashing when retrieved. This action imitates the struggling or fleeing movements of injured baitfish, making them highly attractive to predatory fish.

Design: These lures typically have a shape that resembles a small fish or prey item and often feature a concave or cupped face. The concave face helps create a popping or chugging sound as the lure is retrieved.

Material: Trolling popper baits are typically made of hard plastic, wood, or other durable materials. Some models may have metal components, such as through-wire construction, for added durability
