Packaging & Delivery

Selling Units:	Single item
Single package size:	20X20X15 cm
Single gross weight:	0.600 kg
Package Type:	Simple opp bag. Can be customized packaging also.

Minnow-Style Crankbaits: These lures are designed to mimic the appearance and swimming action of a minnow. They often feature a slender body shape with a diving lip that allows them to dive to specific depths. Minnow crankbaits come in various sizes and colors.

Soft Plastic Swimbait: Soft plastic swimbait is often realistic-looking baitfish lures that come in various sizes. They have a soft, flexible body and are typically rigged on a jighead. They can be retrieved at a steady pace to create a lifelike swimming action.

Jerkbaits: Some jerkbaits are designed to imitate minnows and other small fish. They are typically slender, have a suspending or slow-sinking action, and are used to trigger strikes by imparting action through rod jerks or twitches.

Topwater Minnow Lures: These lures are designed to float on the water's surface and create surface disturbance or a walk-the-dog action. They can be highly effective for species that strike prey from below.

Spinnerbaits: Spinnerbaits can also be part of a minnow lure set. These lures combine a spinner blade, skirt, and a jighead, often resembling small baitfish.

Variety of Colors: Minnow lures come in a variety of colors to match the local forage and water conditions. Having different color options in your set allows you to adapt to changing fishing conditions.

Tackle Box or Storage Container: Many minnow lure sets include a tackle box or storage container to keep your lures organized and protected.
