Basic Information

- Place of Origin: Shandong, China
- Brand Name: Sunrise
- Certification: ISO
- Model Number: EZH 5000
- Minimum Order Quantity: 50 Pieces
- Price: 390 USD/Piece
- Packaging Details: Negotiated / Standard Package
- Delivery Time: Negotiated / 20 Working Days After Payment
- Payment Terms: T/T
- Supply Ability: 10000 Pieces/Month

Product Specification

- Item Name: EZH 5000 Electric Reel Boat Fishing Reels
- Material: Aluminum Alloy Body
- Max Drag: 22kg
- Weight: 960g
- Type: Electric Fishing Reel
- Gear Ratio: 5.0:1
- Fishing Reels Type: Sea Fishing Reels
- Position: Ocean Beach Fishing, Ocean Boat Fishing, Ocean Rock Fishing
- Highlight: ECOODA EZH 5000 Fishing Tackle Set, Fishing Tackle Set Saltwater 22KGS Drag, Electric Boat Fishing Reels 22KGS Drag

WATER METER RANGE	0-999.9m	0-999.9m

The ECOODA EZH 5000 is an electric fishing reel designed for saltwater fishing. Electric fishing reels are becoming increasingly popular for their ability to assist anglers in reeling in large and heavy fish with ease. Here are some key features and information about the ECOODA EZH 5000:

Electric Power: This reel is electric, which means it has an electric motor that assists in reeling in fish. This can be particularly useful when targeting deep-sea or heavy saltwater species that require a lot of effort to reel in.

Line Capacity: The "5000" in the model name typically refers to the line capacity. This reel is likely suitable for holding a significant amount of fishing line, which is important when targeting large saltwater fish that might make long runs.

Durability: Given that it's designed for saltwater use, it's expected to have corrosion-resistant components and materials to withstand the harsh conditions of the ocean.

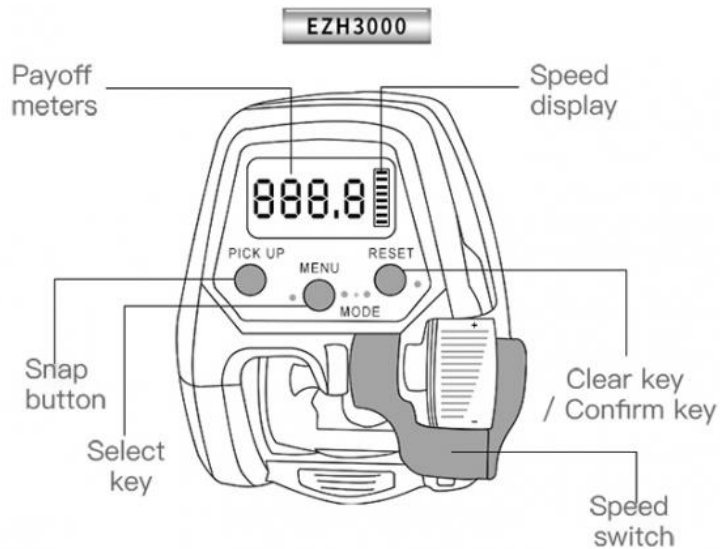

Control and Settings: Electric reels usually come with various settings and controls to adjust the speed and power of the electric motor. These settings can be fine-tuned to match the type of fish you're targeting and the conditions of your fishing environment.

Battery or Power Source: Electric reels require a power source, usually a rechargeable battery, to operate the motor. Make sure to check the battery life and charging time to ensure it suits your needs.

Price: The price of electric fishing reels can vary significantly, so it's essential to compare prices and features to ensure you're getting the right reel for your fishing needs and budget.

Additional Features: Some electric reels come with extra features like digital displays for depth and line length, automatic jigging functions, and more. It's worth checking if the ECOODA EZH 5000 has any additional features that could be beneficial for your fishing style.

Electric wheel operation demonstration

Operation panel diagram

Line number setting

Connect to power and start automatically

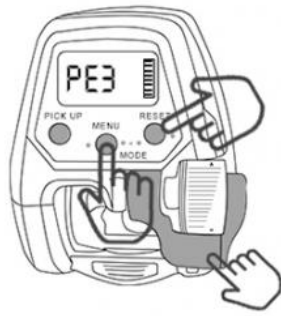

Turn off the power and shut down automatically

Note: When the rated voltage of the power supply is DC 220v, when the voltage is unstable or the positive and negative poles are connected, Electric wheels will protect themselves and stop working

After connecting the power, start the self-test.

The screen shows that the 8-0 self-test is complete. Press and hold RESET and MENU at the same time to enter the setting mode.

Select the line number and the amount of entanglement by menu There are 4 choices:

PE3#-300m, PE4#-250m
PE5#-200m, PE6#-170m

After selecting, press the reset key to confirm.
The screen displays 0.0.

When reaching the set number of meters
5 meters Motor stops, please wind it up
manually or press PICK UP

The winding is completed, press
RESET to complete the setting,
and enter the state of putting out
the wire. The previous setting is invalid.

When the panel displays 0.0 under
the entangled state, Press RESET to
complete the setting and count into
the defense status Continue to use
the last line number and meter
